

TESTING SIRENS

Don't get scared, on Wednesday, 1 February 2023, the annual siren test will take place. At 1.30 p.m. the «general alert» signal will sound throughout Winterthur: a regular ascending and descending howling tone, which lasts for one minute. The public is not required to behave any specific way or take protective measures.

More information about the siren test under sirenentest.ch and in the teletext of the SRG-Broadcaster on the page 680.
